

Broad Spectrum Powder

Four detectable cannabinoids, for real.

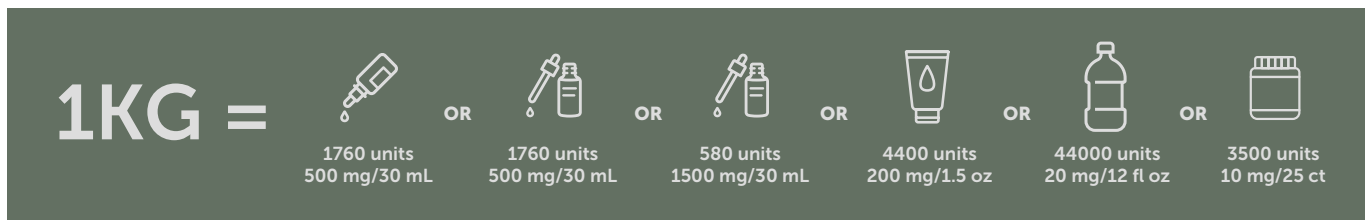

Quick Facts

Typical Profile:	+90% CBD with detectable CBG, CBN, CBC
THC:	Undetectable at 0.1% LOQ
Appearance:	Beige Crystalline Powder
Odor:	Light Natural Terpene Profile
Consistency:	Fine Powdered Crystal
Particle Size:	<1180 μ M (d 50 = 210 μ M)
Bulk Density:	0.278 g/mL
Provided COAs:	Potency, Residual Solvent, Heavy Metals, Pesticides, Microbial

Product Highlights

- + As easy to use as CBD isolate.
- + Achieve maximum CBD dosage with a true broad spectrum.
- + At least 4 detectable cannabinoids in every batch.
- + Easy and accurate dosing.
- + Less product loss during manufacturing than oils.
- + No heating required to homogenize like distillate.

Because of our patented THC-removal process, we're the only company that can eliminate detectable THC while retaining the efficacy of the other cannabinoids. That's why Treehouse's broad spectrum products contain at least 4 detectable cannabinoids, discrediting the theory that broad spectrum extracts are inferior to full spectrum. Our broad spectrum extracts contain more cannabinoids than our competitors' full spectrum counterparts.

Why Treehouse?

We go above and beyond industry standards not because we have to, but because we know that safety, compliance, and service are essential to the longevity of the CBD market. With a team of PhD chemists, a full in-house analytical lab, and rigorous testing standards, we invest our resources into what matters most. Our adherence to some of the strictest certifications in the industry, our patented technology, and our commitment to self-regulation and customer service has earned us the trust of global brands and CBD consumers around the world.
